

National Solar Jobs Census

The Census is designed to gather data on U.S. solar labor supply and demand and is being conducted by The Solar Foundation in collaboration with Cornell University and with support from SEIA and SEPA. This unprecedented Census looks at all types of jobs associated with the solar industry and will provide stakeholders with timely and credible information to understand the solar industry's labor market conditions and potential for growth.

The Census will be released for the first time at the Solar Power International 2010 Conference in Los Angeles.

Free copies of the full report will be made available (for the first time) at The Solar Foundation's Release Party on October 13 from 8 – 10 pm at the JW Marriott at LA Live.
